RAM

2025 RAM 1500

AN UNRIVALLED CLASS OF PICKUP TRUCK

A detailed view of the interior of a 2025 Ram 1500 pickup truck. The image shows the front and rear seats, which are upholstered in black leather with white stitching and a quilted pattern on the backrests. The dashboard features a large, vertical infotainment screen. The center console has a storage compartment with a wood-grain finish. The truck has a sunroof and a rearview mirror with integrated camera and display. The background shows a view of the ocean through the side windows.

THE NEW 2025 RAM 1500. Built to deliver upon the legacy of the Ram Trucks that came before it, the Ram 1500 is roaring in with a redesigned exterior, an even more sophisticated and luxurious interior, a bold new powertrain under the hood, and technology at nearly every turn. The 2025 Ram 1500 features a modern exterior design that conveys a strong and heroic presence. Packed with a host of leading-edge features incorporated into what is undoubtedly the most luxurious pickup interior, even hard work will feel like play. But the real fun begins under the hood. It's there you'll find an unexpected level of power and performance thanks to the all-new 3.0L Hurricane Straight-Six Twin Turbo engine.

Available in a High Output or Standard Output, the new 3.0L Hurricane straight-six twin turbo engine helps make this Ram 1500 not only the strongest, but more importantly, the most refined yet. The top of the range new Ram

1500 Limited continues to raise the bar in the full-size pickup segment with the introduction of the High Output Hurricane engine producing 403kW of power and 707 Nm of torque. The new 1500 Laramie® Sport and Rebel® models powered by the Standard Output Hurricane engine, outmuscle the 5.7L HEMI® engine with an impressive 313kW of power and 635Nm of torque. Even the most discerning V8 lovers sit up and take notice.

From jobsites to highways to boat ramps, the new 2025 Ram 1500 is built to serve those behind the wheel, more than ever. One test drive and not only will you experience serious power, you will experience both an evolution and a revolution of the truck that fans have depended on for years. When it comes to power, performance, and luxury, the new Ram 1500 is an unrivalled class of pickup truck.

HURRICANE

RAM EXCLUSIVE 3.0L HURRICANE STRAIGHT-SIX TWIN TURBO ENGINE

Without a doubt, the Hurricane powertrain is the next evolution in the proud RAM tradition of power and performance.

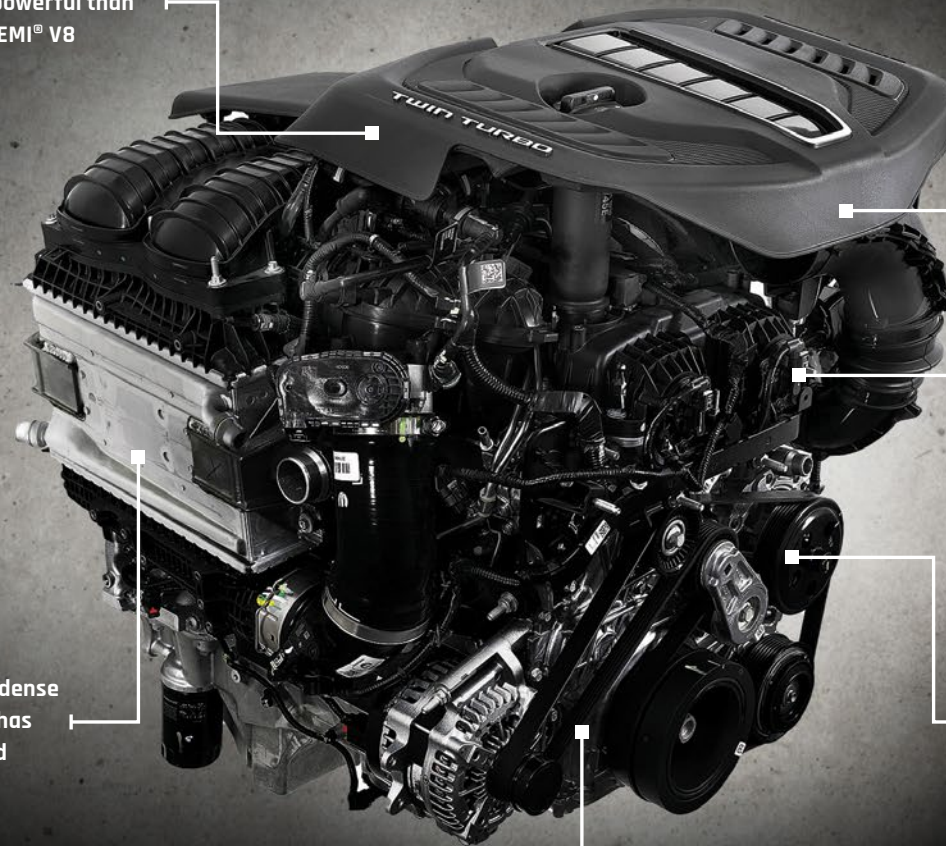

The 3.0L Hurricane straight-six twin turbo engine is the next evolution of Internal Combustion Engine (ICE) technology. The firing order, number of main bearings, and the crank design, all work together to deliver a smoother, more efficient, and more powerful powertrain. It's the most power-dense package RAM has ever offered. There's more power per litre than the supercharged alcohol-injected HEMI®-powered Dodge Demon 170 — along with the incredible torque on demand that inline designs are known for, as well as superior fuel economy.

The foundation of the Hurricane engine is a deep-skirt cast-aluminium block with a structural aluminium alloy oil pan. The strongest RAM engine ever uses cross-bolted steel main bearing caps to contain the robust rotating assembly of a forged-steel crankshaft and forged-steel connecting rods. During manufacturing, the block is deck-plate honed to optimise the cylinder bore shape, which helps improve fuel efficiency.

Each turbocharger in the Hurricane straight-six twin-turbo feeds three cylinders. From a performance standpoint, two smaller turbochargers with less inertia spin up faster and deliver boost to the engine at lower rpm than a single, large turbo. The result? The Hurricane twin-turbo flexes its muscle with a broad, flat torque band that sees the engine maintain at least 90% of peak torque from 2,350 rpm all the way to its red line. Without a doubt, the Hurricane powertrain is the next evolution in the proud RAM tradition of power and performance.

Power output of 313kW / 420HP & 403kW / 540HP makes it more powerful than the 5.7L HEMI® V8

Each turbocharger in the Hurricane straight-six twin-turbo feeds three cylinders.

Two smaller turbochargers with less inertia spin up faster and deliver boost to the engine at lower rpm than a single, large turbo, resulting in superior performance.

The most power-dense package RAM has ever offered

Incredible torque on demand that inline designs are known for, as well as superior fuel economy

More power per litre than the supercharged alcohol-injected HEMI®-powered Dodge Demon 170

	MY25 REBEL [®] HURRICANE	MY25 LARAMIE [®] SPORT HURRICANE	MY25 LIMITED HURRICANE HIGH OUTPUT
POWERTRAIN			
Engine Name	3.0 Litre Hurricane straight six twin turbo (SST)		3.0 Litre Hurricane straight six twin turbo high output (SST HO)
Type and Description	In-line six-cylinder (I-6), twin turbocharged, liquid-cooled, direct injection, petrol		
Displacement (cc)	2.993 cu. Cm		
Bore x Stroke	84 x 90		
Valve System	DOHC, dual independent valve timing, hydroformed tubular camshafts, 24 valves with sodium-filled exhaust valves, roller finger followers & hydraulic lash adjusters		
Fuel Injection	Direct injection, centrally located injectors, single high-pressure pump providing up to 350 bar to a single fuel rail		
Construction	Deep-skirt cast-aluminium block with cross-bolted steel main bearing caps, low friction plasma spray-bore coated cylinders, structural die-cast aluminium alloy pan, aluminium alloy head with pent-roof combustion chambers, forged and twisted steel crankshaft, forged steel connecting rods & forged aluminium alloy pistons with DLC coated piston pins		
Compression Ratio	10.4:1		9.5:1
Power (SAE Net)	313 kW @ 5,200 rpm		403 kW @ 5,700 rpm
Torque (SAE Net)	635 Nm @ 3,500 rpm		707 Nm @ 3,500 rpm
Max Engine Speed	5,800 rpm (electronically limited)		6,100 rpm (electronically limited)
ELECTRICAL / MECHANICAL			
Alternator	230 AMP		
Battery	700 AMP maintenance free battery		
BRAKES			
Brakes Front (mm)	378 x 30 vented disc with 57mm two-piston pin-slider calliper & anti-lock braking system (ABS)		
Brakes Rear (mm)	375 x 22 disc with 57mm single-piston pin-slider calliper & ABS		
Brake Power Assistance	E-booster with integrated control unit		
WHEELS & TYRES			
Wheels	18" Painted mid-gloss black aluminium	20" Premium painted/ polished aluminium	22" Black painted aluminium
Tyre Size	275/65R18C	275/55R20	285/45R22XL
Spare Tyre Full-size	18" Full size steel spare wheel	20" Full size spare aluminium	
Wheel Load Rating (kg)	929

YOUR GUIDE TO PAYLOAD AND TOWING REQUIREMENTS

When it comes to heavy loads and towing, understanding your RAM's capabilities is crucial. At Ram Trucks Australia, we prioritise safety and compliance, ensuring that you are fully informed about the engineering limits of your vehicle and your responsibilities as a road user. Each RAM variant is designed with specific maximum allowable payloads, towing capacities, and combined weight limits, all of which interact with each other and observing these maximums is essential for maintaining the vehicle's integrity and ensuring legal compliance.

Operating your RAM within these Towing Limits is not just a recommendation; it's vital for your safety and the safety of others on the road. Exceeding these capacities (whether individually or in combination) can lead to serious risks, including personal injury, vehicle damage, and financial loss. Our comprehensive guidelines will help you be aware of the complexities of payload management, towing capacities, and weight distribution, and give recommendations on how you can carry and tow securely and responsibly. Scan the QR code to access, read, and observe our Payload and Towing Requirements Guide and be sure to utilise our Towing Calculator tool to estimate the capacity and safety of your tow.

OWNERS MANUALS AND SUPPLEMENTS

Scan the QR code to access, read, and observe Owner Manuals and Supplements resources.

<19 Speakers including subwoofer and six coaxial two-way speakers strategically mounted in 12 locations throughout the vehicle

+Maximum braked towing capacity is subject to regulatory requirements and vehicle weight restrictions (which may require occupants and/or luggage to be restricted)

° Payload and kerb weight figures are based on vehicle certification. It is the driver's responsibility to ensure: weight of fully loaded vehicles do not exceed GVM; front and rear axle load limits are not individually exceeded; the combined weight of the fully loaded vehicle (including tow ball download when towing) and trailer does not exceed the GCM; compliance to State and Territory towing regulations. Payload is the combined value of occupants, luggage, cargo, added options, accessories and tow ball download (when towing). Kerb weight includes the vehicle with a full tank of fuel and all standard equipment, excluding occupants. Additional weights of optional features, occupants, luggage, cargo, accessories and tow ball download (when towing) must be taken into account when calculating payload.

*Figure according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real-world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.
