## ABOUT AVIDA

Avida, a great Australian story, has been manufacturing RVs since 1965 in Western Sydney NSW. Avida remains the number one manufacturer of Motorhomes in Australia with over 50 years of experience building RV products like motorhomes, campervans, caravans and pop tops. At a time when much of Australia's manufacturing is fast disappearing overseas to the detriment of local jobs, Avida remains in the original hands of the founder as a true Australian family company employing and supporting hundreds of Australians and their families at the 4 hectare (10 acre) site. You can be very confident you've made the right decision when you purchase an Avida.

Avida – Australian owned, Australian built.
