

ADVANCED PROTECTION

FUSION

FUSION

Advanced Protection Fusion Program is a unique and complex fusion of the latest Nano-Ceramic technologies, including Siloxenite™, developed to protect both the interior and exterior of your vehicle to maintain its 'like new' appearance and feel.

ADVANCED PROTECTION

FUSION

Exterior

"Fusion Paint Treatment is a unique formulation using Nano-Ceramic technology with Siloxenite™"

- § Nano-Ceramic paint treatment with Siloxenite™
- § Preserves and protects modern vehicle paintwork
- § Penetrates deep to preserve gloss and colour

ADVANCED PROTECTION

FUSION

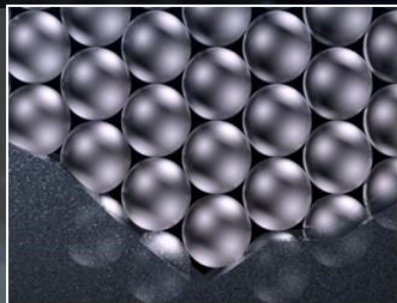

"FUSION Paint Treatment is a unique formulation using Nano-Ceramic technology with Siloxenite™"

Exterior

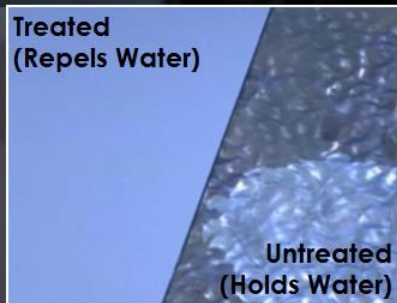

1

These are the microscopic undulations in factory paint that trap harmful contaminants and cause the paint to deteriorate (10,000 times magnification).

2

Fusion Exterior penetrates deep and seals the undulations, forming a tight nanostructure which chemically bonds to the paint (30,000 times magnification).

3

Dirt and grime sits on top of the water-repellent surface without clogging the paint, making washing easier. Gloss and colour is protected, enriched and preserved.

Protects against:

- 🔥 Fruit Bat Excrement
- 🔥 Bird Droppings
- 🔥 Environmental Fallout
- 🔥 Acid Rain
- 🔥 Berry & Fruit Stains
- 🔥 Colour Fading
- 🔥 Insect Marks
- 🔥 Oxidisation

ADVANCED PROTECTION

FUSION

"Protects against UV rays and every-day grime"

Interior

The same as protecting the outside of your vehicle, Fusion is an advanced treatment for leather and fabric interiors providing durable protection against UV rays, every-day spills and grime.

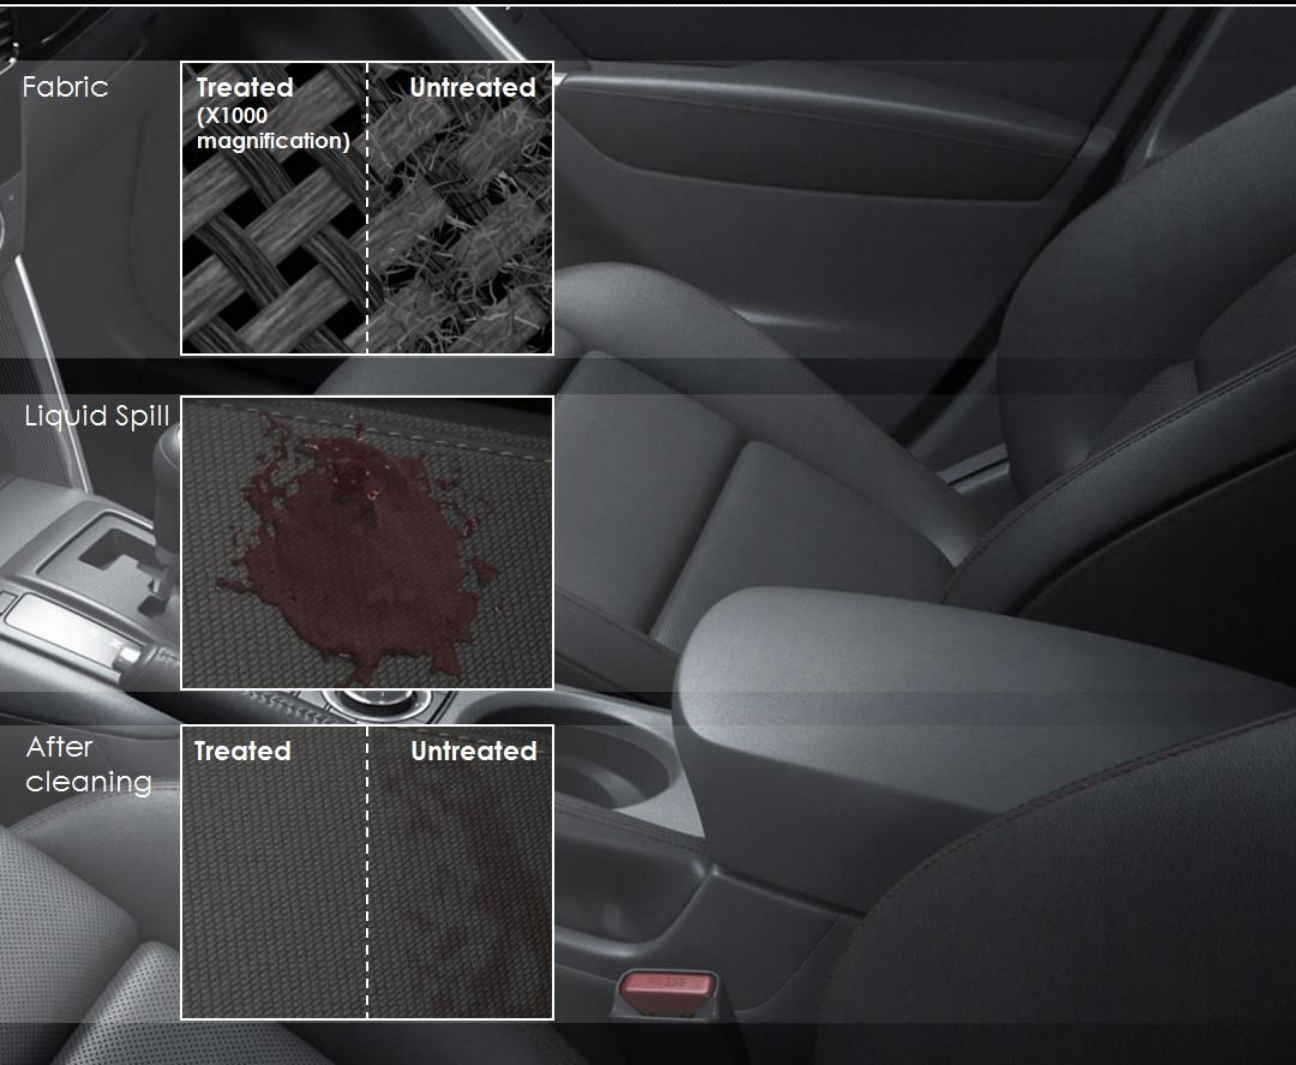

ADVANCED PROTECTION

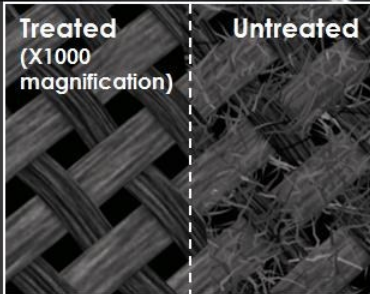

FUSION

"Protects against UV rays and everyday grime"

Interior - Fabric

Fabric

Liquid Spill

After cleaning

Protects against:

- ☛ Alcohol & Red Wine Stains
- ☛ Soft Drink & Soy Sauce

ELECTRONIC CORROSION CONTROL

"A unique combination of High Energy and Capacitive Coupling Technology"

The Advanced Protection RP3 Module combines Impressed Current and Capacitive Coupling technologies (known as HECC or High Energy Capacitive Coupling) to provide the best corrosion protection available.

- HECC Composite Technology
- High Frequency Output
- Waterproof
- Heat Resistant
- 100% Flameproof Casing
- External Fuse
- High & low Voltage Protection
