

Refresh

Refreshes and revitalises your paintwork and sanitises your vehicle's interior

Interior Refresh

Because we spend so much time in our cars, whether we're driving to work or the gym, or doing the school pick-ups and drop-offs, our cars are living spaces for germs and bacteria. Over time, air-conditioning and heating systems can spawn millions of microbes, food and drink spills can give way to mould, and kids and pets are the perfect passengers to drag dirt in from everywhere. All this results in invisible germs and foul smells that can seem impossible to remove, even with expensive cleaning and detailing.

Permagard Antimicrobial Shield is a unique non-toxic coating that combats the germs in your car by forming a barrier on the surfaces of your vehicle's interior cabin.

The antimicrobial treatment will sanitise and protect all interior surfaces, and will help to eliminate unpleasant odours. The coating will also leave an invisible film of Antimicrobial protection that will continue to work even following interior cleaning.

- Removes 99.99% of germs
- Protects for extended periods of time
- Reduces cabin odours such as pet odours, mould and mildew
- Invisible and odourless
- Non-toxic, hypoallergenic household products are too toxic or too powerful they could damage your vehicle's surfaces.

You can now preserve that 'new car' freshness with Permagard Antimicrobial Shield. The non-toxic, hypoallergenic automotive sanitation system safely eliminates 99.99% of all bacteria and has been created with young families, sensitive noses, pet lovers and germ-conscious drivers in mind.

Exterior Refresh

If you know anything about cars, you'll know depreciation can be the single most expensive cost of owning a car. Paint can fade, upholstery ages and there's general wear and tear that happens over time. But there are things you can do to breathe new life into your vehicle that could not only improve your enjoyment of your car but boost its resale value as well.

Utilising elements of Permagard's patented Reactive Polymer coating, the exterior refresh surface treatment will revitalise your vehicle's paintwork and add a glass-like finish with a minimum of fuss and cost.

Once the treatment has been applied by our trained technicians, there will be no need to wax or polish your vehicle for up to 12 months.

- Ultra-gloss, bonded Polymer coating
- Helps repel dirt and grime
- Easy clean surface
- 12-month Permagard Warranty (renewable on reapplication)
