THE DAWBORN STEELS GROUP

Not a family business, but rather a business run by family – creating and maintaining a strong family culture is key for Dawborn Steels Trading.

We are a family owned and managed company. Our company has passed through two generations of Dawborns with great success and is one of Australia's longest standing independent steel trading and stocking operations.

Servicing the industry for over 30 years, the Dawborn name has been synonymous with the Victorian steel industry since 1902, with Dawborn Steels Trading Pty Ltd independently founded by Leigh in 1982. Joined by his son Tim Dawborn in 1993 and daughter Melanie shortly there after, the family business was established.

The Dawborn Steels Group acquired Contract Slitters (VIC) Pty Ltd in 1994, becoming an independent steel trading and processing group. Contract Slitters Managing Director, Tim Dawborn, runs the business together with Melanie who manages production and administration for the group.

Today, Dawborn Steels in conjunction with its subsidiary companies, employs over 40 established staff members.

The group prides itself on customer service: the perfect size to offer a personalised service and maintain strong relationships, as well as being large enough to be highly competitive on price.

Our longstanding and experienced staff members have extensive product knowledge and strong expertise in all aspects of the industry.
