

Imagine that

i30 N.

Let's play.

Overseas model shown.

Let's play.

Welcome to the Hyundai N division. A place where high performance meets serious fun. Where dynamic prowess is an invitation to exhilaration. And where one corner is only ever an entrée to the next.

Born in Namyang and honed at the Nürburgring, 'N' is more than an attitude. It's an elite team of world-class engineers assembled to deliver the next phase of Hyundai's evolution — delivering a track-ready¹ family of hatches, sedans and SUVs that are built to thrill, whether you're attacking a tight and twisting hill climb or simply on your daily commute.

Intoxicating performance. Enthralling passion. And undeniable fun – to the N'th degree.

1. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

More performance. More fun.

How do you ensure the very first N model is worthy of Hyundai's performance badge? You punish it.

And so the first i30 N was subjected to a brutal development program that took in nearly 500 laps at the Nürburgring circuit, and around 10,000 kilometres of testing overall, all so we could make sure it was ready for whatever you want to throw at it.

But Hyundai's N engineers are never finished, and so the new i30 N doesn't just introduce a quick-shifting DCT automatic gearbox option, but also delivers more equipment, more power, more performance, and more thrills.

This is the N story continued - strap in.

Pc

The heart of any high-performance car is its engine, and the new i30 N's turbocharged 2.0-litre, four-cylinder powerplant now delivers even more power, and an enhanced exhaust note, unlocking faster acceleration and an even more spine-tingling soundtrack.

Our N engineers have been busy in the Namyang performance lab, fitting a new turbocharger and intercooler to the updated i30 N's engine to increase the hot hatch's already-potent outputs to a thrilling 206kW and 392Nm.

Not finished, our N engineers then introduced a new 'flat-power' engine ECU tune that boosts flexibility and responsiveness during normal driving conditions, as well as increasing outright acceleration and linear torque delivery when you're getting busy on a racetrack¹.

The i30 N's performance-tuned engine also features direct injection, variable valve timing and twin-scroll turbocharging, while a high-capacity cooling system ensures it runs at its optimum operating temperature, even when the heat is really on.

This is the i30 N, evolved.

wer

206kW. 392Nm.

1. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Supercar-style shifting.

The new i30 N introduces the option of the first **N-developed automatic gearbox**, a new eight-speed dual-clutch transmission that delivers an entirely new drive experience.

The N DCT is unlike any automatic gearbox you've experienced. Designed and developed by the N engineering team, the quick-shifting automatic is all about putting the driver at the centre of the experience.

Left in automatic mode, the N DCT will seamlessly adapt to the conditions, whether you're on a racetrack¹ or stuck in traffic. But when you want to take control, you simply engage manual mode and shift gears via the paddle shifters on the steering wheel, or, for a true race-car experience, by pushing forward or pulling back on the gear selector.

With lightning-quick upshifts and rev-matching downshifts, the N DCT offers all the thrills of a manual with the daily driving convenience of an automatic.

Manual or automatic, the choice is yours. Either way, you're in for an incredible ride.

1. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Overseas model shown.

New features. More fun.

But what about those moments when too much performance is never enough? The i30 N DCT has you covered, with three new N Performance modes that unleash an even more potent punch, exactly when you need it.

N Grin Shift.

Like hitting the afterburners, N Grin Shift (NGS)¹ mode releases the maximum power of the engine and transmission for a thrilling 20-second burst — magic for race track start² dominance.

N Power Shift.

N Power Shift (NPS)¹ mode reads your intentions, engaging when you use more than 90% throttle, delivering maximum power to the wheels while activating the DCT's fastest shift pattern.

N Track Sense Shift.

N Track Sense Shift (NTS)¹ mode will activate automatically when it recognises the conditions are perfect for dynamic driving, like when you're on a racetrack², leaving you free to focus on nothing but the tarmac ahead.

1. NGS, NPS and NTS only available on DCT variants.

2. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Overseas model shown.

Performance, reimagined.

The N brand is all about connecting man and machine. Key components of the new i30 N - from the suspension to the steering, brakes and wheels - have been thoroughly revised to thrill enthusiasts.

An entirely reworked suspension geometry delivers an even more connected ride. And to ensure the i30 N is perfectly set-up for Australian conditions, whether on the road or the racetrack¹, all three modes in the Electronically Controlled Suspension (ECS) system have benefited from a bespoke Australian tune.

All N drivers expect exceptional turn-in characteristics and body control, without sacrificing the ride compliance needed for daily driving comfort, and the i30 N delivers, with the update focused on enhancing all elements of the drive experience, rather than drastically altering it.

Hyundai's first factory-developed ultra-strong **forged 19-inch light alloy wheels** don't just look the part, but cut a total 14.4kg from unsprung weight to enhance the i30 N's ride, handling and acceleration, while bigger 360mm front brakes clamped by signature red N calipers further enhance your stopping power.

1. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Corner-carving brilliance.

The i30 N's electronically controlled mechanical limited-slip differential (e-LSD) uses a hydraulically actuated clutch pack to distribute torque intelligently between the two front wheels depending on throttle inputs, steering angle and cornering force. This technology reduces wheel-spin and understeer while increasing traction and cornering speed, thus allowing the driver to extract maximum performance from their N.

Superior steering.

Extensive upgrades to suspension hardware ensure brilliant dynamic performance. Zero scrub radius makes the steering more precise, delivering faster on-centre response and improved linearity.

Electronic Controlled Suspension.

The i30 N is fitted with an Australian-tuned Electronically Controlled Suspension (ECS) featuring three selectable damping modes: Normal, Sport, and Sport+. Yet it's not as simple as Soft, Medium, and Hard. The sophistication of this system allows continuous damping control, independently adjusting the compression and rebound damping force for each of the four dampers all the time. ECS incorporates three primary control functions: Event Control can intervene with greater damping force when a significant body G load is detected, assisting in big bump recovery and improving overall vehicle stability. Ride Control performs road surface detection, and selects the appropriate damping force for the impacts detected by the vehicle's G sensors. Finally, Load Transfer Control contains roll, pitch and yaw. This function reduces dive under brakes, improves turn in, and allows the i30 N to extract maximum adhesion from its tyres in dynamic driving.

Overseas model shown.

For the driven.

Launch control.

The i30 N's Launch Control function allows any driver to make a perfect, fully optimised standing start like a professional driver every time. When selected, **Launch Control** enables the driver to simply flatten the throttle, and the system's sophisticated electronics manage torque output, minimise wasteful wheel-spin and make the quickest getaway possible.

High-performance shifting.

The new N DCT has been designed for supercar-style shifting, with lightning-quick upshifts and rev-matching downshifts, while the six-speed manual transmission has been optimised to provide short, positive throws of the lever, with ratios intelligently chosen to maximise the engine's power and torque characteristics.

Enhancing both gearboxes is **automatic rev matching**¹, a function that automatically blips the throttle on downshifts, faithfully replicating the 'heel-and toe' technique used by advanced drivers to deliver smooth downshifts where revs and road-speed are perfectly synchronised. However, this feature can be disabled for skilled drivers who demand the ultimate control and performance driving experience.

1. Available on manual variants only.

Overseas model shown.

Drive it your way.

N Drive Mode System.

No matter what the road or driving conditions, the i30 N has a mode to suit. Choose from five individual drive modes: Eco, Normal, Sport, N or N Custom settings, activated by two dedicated buttons on the steering wheel. Crucially, all the discrete parameters of engine mapping, damper firmness, steering weight, e-LSD characteristics, stability control and exhaust sound level can be individually selected and saved via the N Custom setting, allowing unprecedented tailoring of the i30 N's driving experience. In fact, the N Custom mode allows a possible 1,944 combinations to be selected.

Sounds like a hot hatch.

So how does it sound? The i30 N's new and enhanced Active Variable Exhaust System is a twin-outlet installation featuring three settings, allowing the driver to select the ideal level of exhaust sound for the conditions – keep it subdued around town, or allow the engine's full vocal range to be enjoyed when the open road or track¹ beckons. In its most sporting setting, throttle lifts and downshifts bring a thrilling volley of rasping crackles and pops that have to be heard to be appreciated.

1. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Form meets function.

The new i30 N features an exterior designed to cheat wind and win hearts.

New front and rear bumper designs, a new lighting system featuring integrated LED DRLs, and new-look taillights give the familiar i30 N a fresh and aggressive new look, while the cascading grille seems drawn to the tarmac below, making no secret of its performance potential.

At the rear, new and larger exhaust outlets forewarn of the i30 N's exhilarating soundtrack, while the dual-level spoiler and redesigned diffuser add both style and performance substance.

The interior of the i30 N is all about the driver. All models are fitted with figure-hugging, leather appointed¹ N Sports Seats that provide superb lateral support. N Premium variants are equipped with new **lightweight N Light Seats**, featuring an illuminated N logo, which trim a combined 2.2kg from the vehicle's kerb weight.

In front of the driver sits the bespoke N steering wheel with dedicated N-mode button, as well as an **N-specific race computer** which features a lap timer, G-force meter, boost gauge, and launch control. The shift timing indicator positioned at the top centre of the cluster indicates when to shift gears for optimal track² driving.

1. **Leather appointed** may contain elements of genuine leather, polyurethane leather (leather substitute) or man-made materials, or a combination thereof.

2. Warranty covers track use provided the vehicle is operated in accordance with the Owner's Manual and Service Warranty Passport. Exclusions apply including racing, rallying, competition or speed/endurance trials and defects caused by or attributable to improper use of vehicle. Refer to full warranty T&Cs for details and exclusions.

Overseas model shown.

Connected convenience.

Big thrills deserve a big screen to view them on, which is why the i30 N is fitted with a new 10.25" multimedia system that incorporates a new **N Grin Control** user interface featuring a fully customisable performance layout. The i30 N also comes with other convenience features as standard, including wireless charging¹, smart key with push-button, and Apple CarPlay™² and Android™ Auto³ compatibility.

Satellite navigation with Live Traffic Updates helps you navigate the best route, while the crystal-clear six-speaker stereo system will ensure you're entertained along the way. A heated steering wheel⁴ and front seats⁴ will make sure you are warm and comfortable, whether you are driving home from work or out for a spirited drive.

1. **Wireless smartphone charging** requires a Qi-enabled smartphone or adapter to operate.
2. **Apple CarPlay™** is a trademark of Apple Inc., registered in the U.S. and other countries. Requires compatible device and connectivity.
3. **Android™ Auto** is a trademark of Google LLC. Requires compatible device and connectivity.
4. Available on N Premium and N Premium with sunroof variants.

Overseas model shown.

Backed with safety technology.

When you get in a car that performs as well as the i30 N, it's comforting to know that you're backed by some of the best safety features available. That's why we've fitted the i30 N with **Hyundai SmartSense™¹** technologies.

The i30 N constantly monitors the area surrounding it in 360 degrees using both camera and radar feedback, whether you're travelling at motorway speeds or simply reversing into a tight spot. Systems such as Blind-Spot Collision-avoidance Assist–Rear (BCA-R)² and Blind-Spot Collision Warning³ (BCW), Forward Collision Avoidance Assist (FCA), and Rear Traffic Collision-Avoidance Assist (RCCA)² keep track of other cars, and even cyclists and pedestrians, reacting instantly if a possible collision is detected² — and in certain circumstances even providing steering assistance and braking independently in an emergency⁴.

Complementary systems such as Leading Vehicle Departure Alert (LVDA), Lane Following Assist (LFA) and Lane Keeping Assist (LKA) can be toggled on and off to actively provide a helping hand, even on routine journeys. Regardless of why you're driving, or how deeply engaged you are, SmartSense¹ has your back. Other systems help to keep you and your passengers safe, even when the engine has been turned off. Safe Exit Warning, for example, sounds an alarm if a rear passenger is about to open their door in front of a detected approaching vehicle⁵.

But it's not just Hyundai SmartSense™¹ technologies that are helping to keep you protected. The i30 N also comes with seven airbags as standard, rear view camera and Front and Rear Park Assist System and Tyre Pressure Monitoring System (TPMS).

1. **Hyundai SmartSense™** is a registered trademark of Hyundai Motor Company. Safety features are not a substitute for attentive driving.

2. Available only on DCT variants.

3. Available only on manual variants.

4. Safety systems may not detect all possible collisions, and are not a substitute for attentive driving.

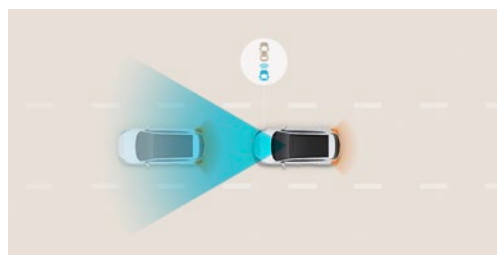

5. Safety systems may not detect all possible hazards, and are not a substitute for attentive vehicle use.

6. Collision detection safety systems may not be activated in all circumstances.

Hyundai SmartSense™¹

Overseas model shown.

Forward Collision-Avoidance Assist (FCA)

This safety system uses a windshield-mounted camera to detect and monitor vehicles and pedestrians in front of the car. If the system thinks a collision is likely, it sounds a warning chime and displays a visual alert. Autonomous Emergency Braking (AEB) can also automatically apply the vehicle's brakes if it detects a chance of a collision.

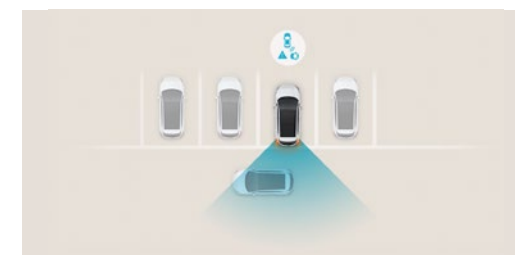

Lane Keeping Assist - Line (LKA-L)

This safety feature uses the windshield-mounted camera to detect lane markings and road edges to monitor the i30 N's position in the lane. Should the system detect the vehicle straying from the intended lane without indicators being activated, an audible and visual warning will be sounded and where required, steering intervention may be provided to help keep a veering vehicle in the centre of its lane. Driver Attention Warning (DAW) will recommend you take a break if it detects careless or inattentive driving.

Blind-Spot Collision Safety Features

Blind-Spot Collision Warning (BCW)³ system warns the driver when it detects a vehicle in the blind-spot zone via warning lights in the side mirrors. If the driver indicates to change lanes while a vehicle is detected, the BCW system will display a warning on the cluster, and issue an audible alert. The Blind-Spot Collision-Avoidance Assist Rear (BCA-R)² monitors for vehicles next to and diagonally behind the i30 N. If a vehicle is detected in the blind spot while the turn signal is flashing BCA-R automatically applies front braking before your attempted lane change, helping to avert an unsafe lane change and potential collision.

Rear Cross-Traffic Collision-Avoidance

The Rear Cross-Traffic Collision Warning² (RCCW) system monitors for traffic approaching on either side of the i30 N when reversing out of perpendicular parking spaces. Should RCCW detect a vehicle approaching, an alert is sounded and a warning is displayed on the cluster. In the case that the driver does not adhere to the warning, Rear Cross-Traffic Collision⁶-Avoidance Assist (RCCA)² may use braking force and help avoid a collision with the approaching vehicle.

Relax, we'll take it from here.

We built iCare around one simple, innovative idea. That comprehensive on-the-road care should come standard with every car – not just as an “optional extra.”

Our five-year, unlimited-kilometre warranty¹ means you've got the freedom to go ahead and drive without having to keep an eye on the odometer.

Imagine knowing the maximum price for scheduled service items, before pulling into the service centre. That's the advantage of our Lifetime Service Plan² – a clever Hyundai initiative that gives you transparency and peace of mind for the life of your car. No hidden fees or surprises.

Since every new Hyundai is built to the highest standards, we've got the confidence to offer comprehensive customer service without exception – or as we like to say, amazing as standard. And that includes Sat Nav Update Plan³ for up to 10 years, and 24/7 Roadside Support⁴ for 10 years when you service with us.

Plan

iCare

1. **5 year/unlimited km warranty:** Applies to new passenger vehicles used for private/domestic purposes. Excludes vehicles used at any time for “commercial application” as defined in the vehicle warranty policy, for which a 5 year/130,000km (whichever occurs first) warranty applies. Refer to full warranty terms & conditions for details and exclusion. www.hyundai.com/au/warranty. 2. **Lifetime Service Plan:** For the benefit of Hyundai owners, Hyundai provides online quotes which specify the maximum price applicable for a vehicle's next scheduled maintenance service at a participating authorised Hyundai dealer and using genuine Hyundai parts (where required). Online quotes are available at hyundai.com/au/en, apply for a stated effective period only and may change after that effective period without notice. Standard scheduled maintenance services are of limited scope. The benefit of online quotes is available for all Hyundai vehicles, for their lifetime. 3. **Sat Nav Update Plan:** Maximum number of 9 updates delivered on an annual cycle which must be undertaken within 10 years of the vehicle's purchase. Included map updates apply only if the vehicle completes a scheduled service at a participating Hyundai dealer. 4. **Roadside Support Plan:** Receive 12 months Roadside Support when you purchase a new Hyundai passenger vehicle (excluding rental buyers). Further Roadside Support extensions are available, each for 12 months from the date of a scheduled maintenance service at a participating authorised Hyundai dealer (unless vehicle is more than 108 months (9 years) from the original new car sale date, in which case entitlement to Roadside Support ends when vehicle reaches 120 months (10 years) from original new car sale date).
