OPENING WORDS

FROM OUR GENERAL MANAGER

“Moving What Matters” is the theme for this April May catalogue. It is a simple catch phrase but one that I think embodies what we do every day in the transport and logistics game right across Australia.

For PACCAR Parts and PACCAR Dealers “Moving What Matters” means having a focus on our core and essential product range offerings. In the transport game essential products are Batteries, Brakes, Air bags, Wheels, Filters, Lighting, Radios, Engine Components, AdBlue, & Oil. We only sell the best, that is why we are the best! We don’t over promise, and we don’t over charge to keep your combination on the road. We leave that to others!

On the flip side, we are sometimes not the cheapest but, and it is a big but, our product availability right across this bloody massive country is light years ahead of all the competitors combined. Why would you put your aftermarket parts & service needs in the hands of anyone else? Especially in today’s world of crisis after crisis. Minimise your business risk with PACCAR Parts.

Combined with our Dealer network, we have well over \$100 Million dollars of Truck and Trailer inventory available for you 24/7. That should help you sleep at night.

We are battling through the long term Covid-19 fallout, severe flooding (again) right across the nation and now European conflict. What is next? PACCAR Parts and PACCAR dealers can’t prevent or end these global events from occurring, but we will remain resolute and entrenched in our Mission to always provide the right part, at the right time, to maximise our customer’s uptime! Moving what Matters is the only way.

April 2022

Keeping safe

PACCAR Parts releases timely road safety advice for drivers over the Easter period.

With every Australian state and territory border open this Easter for the first time in two years, and large numbers of travellers heading onto the roads, PACCAR Parts urges truck drivers to play it safe during what is expected to be a busy holiday period.

“PACCAR Parts is a strong advocate for a safe and efficient Australian trucking industry and we are committed to helping raise awareness of important extra steps you can make to maintain your safety on the road,” said PACCAR Parts General Manager, Damian Smethurst.

Australia’s leading specialist insurer NTI shares PACCAR Parts’ vision for making the Australian road transport industry a safer place to work, demonstrating this commitment through its annual NTARC Major Accident Investigation Report.

The 2021 report covers major transport incidents that occurred involving NTI insured vehicles in 2020 and contains several key findings:

- The frequency of crashes over \$50,000 involving heavy vehicles declined in 2020, likely due to a reduction in traffic volumes during the pandemic.
- 31 truck occupant crash fatalities were recorded, down from a staggering 53 in 2019.
- Crashes caused by inappropriate speed and driver error continue to increase, with over half (54.5%) of all serious crashes caused by these two factors.
- Crashes caused by fatigue dropped to the lowest proportion in the nearly 20-year history of the NTARC report (8%). Despite this, fatigue remained the largest cause of crashes with truck driver fatalities.

Mr. Smethurst urged drivers and operators to give this final point extra consideration ahead of the Easter period.

“We know that holiday periods bring increased pressure on transport, with increased consumer demand and traffic volumes, combined with holiday and family pressures contributing to the ‘whole of life’ workload for drivers,” he said.

NTI Transport and Logistics Risk Engineer and NTARC report author Adam Gibson said there are several factors which contribute to fatigue crashes.

“The leading cause of truck driver fatalities is fatigue, with just under 40 per cent of fatal crashes being a result of this. Underlying that is a range of complex factors but one of them is access to sufficient quantity and quality of sleep,” he said.

“There’s research that suggests over 40 per cent of truck drivers have obstructive sleep apnea. This is obviously deeply concerning, given that we know the condition is eminently treatable, but when untreated creates an elevated risk of fatigue.”

Mr Gibson said there is a hesitancy among some drivers to get tested, with the lack of industry discussion on the topic prompting NTI to partner with sleep and respiratory health expert, Dr. Robert Adams.

“It’s not as simple as telling drivers they need to sleep more; sleep apnea is a medical condition, and it requires medical treatment,” he said.

Mr Gibson pointed to a new health advisory brochure developed in collaboration with Dr. Adams that is designed to help drivers identify the signs of sleep apnea, and provide suggestions on how to get tested.

“Fatigue is a known killer, so this Easter be sure to take your mandatory rest breaks, avoid driving if tired, be careful on your first shift back, and check out NTI’s sleep apnea infographic via the link below*. It could save your life,” said PACCAR Parts’ Damian Smethurst.

on the road this Easter

PACCAR Parts Australia Announces Gilbert & Roach Newcastle as 2021 PACCAR Parts Dealer of the Year

From left: **Scott Medhurst** – Dealer Principal, Gilbert & Roach Kenworth DAF Newcastle & **Damian Smethurst** – General Manager, PACCAR Parts Australia

Melbourne – March, 2022

PACCAR Parts Australia announces Gilbert & Roach Kenworth DAF Newcastle as 2021 PACCAR Parts Dealer of the Year. This prestigious award recognises a dealer's excellence in performance in areas including customer support, sales growth, parts availability, retail marketing activities and training.

Damian Smethurst, General Manager of PACCAR Parts Australia presented the Dealer of the Year award to Gilbert & Roach Newcastle, handing over the award to the Dealer Principal, Scott Medhurst.

Damian Smethurst, General Manager of PACCAR Parts Australia, congratulated the dealership saying, "It is such a thrill to be here presenting this award to the Newcastle team today. We know that it takes a great team to win awards like this, but it really does start with great leadership."

"The team at Newcastle achieved outstanding parts results across the board in 2021 in the most challenging of environments as well as expanding their operation by opening a TRP store in Gosford, NSW. Scott, the Dealer Principal and Joel, the Parts Manager of Gilbert & Roach Newcastle are passionate about supporting customers and it was their first-class leadership and commitment to parts and service excellence that helped them win this award. Congratulations!" added Smethurst.

Scott Medhurst, Dealer Principal of Newcastle proudly received the award saying, "I am extremely proud to accept this award on behalf of Joel MacDonald and his parts team. The Gilbert & Roach Newcastle parts team consistently delivers outstanding service to our customers. They are always looking and adopting new innovations and technologies to improve parts availability and customer service in our Dealership. Their number one goal is to minimise customer downtime and maximise their uptime."

He went on to say, "2021 was a challenging year to say the least, but by working closely with the PACCAR Parts team they have succeeded in meeting and exceeding their goals. I am looking forward to another successful year in 2022."

POWER TO GO THE DISTANCE

WITH THE **NEW** **Kenworth Genuine Battery**

There are high demands and expectations from batteries in commercial applications such as trucks, buses, agricultural and construction equipment. Not only are they expected to provide long lasting and reliable power throughout the course of the journey, but they're also expected to withstand harsh environmental conditions in varying terrains along the way. Coupled with this are the increasing demands of in-built electrical equipment and requirements to meet increasing environmental and safety regulations. Of the few batteries in the market that can meet all these needs, the new Kenworth Genuine Battery, KGE780HD, leads the way.

Suitable for all Kenworth models, the KGE780HD is a sealed maintenance-free battery, powered by calcium technology. It is designed to deliver unbeatable, long lasting performance and great value for customers. The battery's low self-discharge

rate provides long shelf life and longer run times. The KGE780HD is built to last, lowering the overall cost of ownership and making it a suitable choice for commercial fleet operators.

Its heavy-duty construction makes a significant contribution to its performance capabilities. The battery can deliver high cranking power and resist corrosion and vibration in harsh operating conditions. It has improved cycling capabilities even in a low state of charge. The thick positive and negative plates and large intercell connectors provide increased durability for demanding commercial applications. The battery's integrated handle design makes it easy to handle and install the battery safely and efficiently. These features of the KGE780HD battery make it a suitable choice for customers seeking a powerful, durable and a maintenance-free battery for their commercial application.

SPOTLIGHT ON

GENUINE PARTS

The combination of thicker plates and internal lock bonding provides superior durability and vibration resistance, extending battery service life

SCAN ME

The KGE780HD battery is fully backed by PACCAR, and is manufactured by an award winning, world leading supplier who is at the forefront of battery technology with expertise in battery performance and the systems that rely on them. The KGE780HD battery is a culmination of this expertise and is precision-built to provide long-lasting performance in the most extreme of conditions. It comes with a 12 month warranty (unlimited kilometres) which is a further testament to the product's quality.

Elaborating on the new Kenworth Genuine battery's performance capabilities, Phillip Reynolds, Senior Product Manager at PACCAR Parts said, "It's fantastic to provide a maintenance free factory fit battery option that current truck customers are embracing. Carrying the Kenworth Genuine name typifies the quality and longevity synonymous with the Kenworth product. Those traits are backed with extensive field

trials, partnering with high performing suppliers and ultimately leads to customer acceptance through proven performance."

Since its introduction in late 2021, the KGE780HD battery has been well received, growing in popularity in the after-market customer base after being introduced as the OEM battery of choice in Kenworth factories. The heavy duty battery is available exclusively at 48 PACCAR Parts and 10 TRP dealerships Australia-wide. This battery complements a full range of batteries for trucks, cars, boats, caravans and motorcycles that are also available at competitive pricing, all backed by PACCAR.
