KENWORTH
GENUINE PARTS

Pro Wash

MEMBERS FROM
\$10.95

NON-MEMBERS FROM
\$14.95

Kenworth Genuine PRO Wash is a clear concentrated super foaming wash gel in iconic Kenworth Red coupled with the popular Ice fragrance. Extremely high solid content compared with conventional truck washes, the higher level of active components means a higher dilution potential with Kenworth Genuine PRO Wash able to be diluted up to 200:1.

Chris Fillingham
Brisbane PDC Manager
PACCAR Parts Brisbane, Australia.

The new PACCAR Parts Distribution centre in Brisbane.

4.2 million parts is the number of individual components that the PACCAR Parts' Bayswater and Brisbane Distribution Centres (PDCs) shipped out to our Dealer Network last year. A number which grew from the previous year and is expected to continue to grow in 2024.

To keep up with the continued growth in sales and volume flowing through our PDCs and Dealer Network, PACCAR Parts has invested in expanding our two PDCs over the last 12 months.

Construction work in the Bayswater PDC has been ongoing throughout the year, and June 2024 saw the Grand Opening Ceremony of the new Brisbane PDC building, following a move to a 12,400SqM facility in late 2023 - doubling the available warehouse space from the previous warehouse.

The relocation was carried out over a two-month period by the dedicated team in Brisbane, with support from Bayswater facility. During this period, not only did the team continue to support the dealer network with daily orders, but it also relocated the

stock, racking and infrastructure to the new facility - without downtime and ensuring we maintained the accuracy of our stock in the process. I'm extremely proud of the diligent and focused team achieving this incredible feat with great precision and timing.

The new facility currently houses over 20,000 available part locations and a growing inventory value of A\$18.9M, with room to expand our parts storage locations to keep up with a growing product range over the coming years. The facility primarily supports 23 Dealer Locations throughout Queensland and mid-Northern New South Wales. The larger space allows the facility to hold a wider range of products as well as additional stock of existing parts - reducing lead times and increasing availability.

September 2024

Chris Fillingham
Brisbane PDC Manager

FIND YOUR NEAREST DEALER ON
paccarparts.com.au/find-a-dealer

Don't compromise the premium performance of your truck axles

If you are not using an approved axle oil in your truck you are risking axle failures or warranty implications.

To find out more and ensure your truck gets what it deserves, visit your local PACCAR Parts or TRP store

STANDARD CHOICE, FACTORY FILL AT KENWORTH AUSTRALIA – SAE J 2360 APPROVED

CASTROL TRANSMAX AXLE AP 85W-140

- A multipurpose gear oil for use in most trucks, LCV, and passenger cars' conventional differentials, non synchronized manual transmissions, and steering gears where API GL-5 performance is required.

It is not recommended for Eaton, Spicer, Renault, or Rockwell transmissions as those manufacturers prefer non-EP transmission oils.

FEATURES & BENEFITS

- Formulated for high thermal stability, reducing oxidation and deposits
- Excellent wear protection prolongs component life.

FACTORY FILL SEMI SYNTHETIC FACTORY FILL UPGRADE OPTION – SAE J 2360 APPROVED

CASTROL TRANSMAX DYNADRIVE LONG LIFE 80W-90

- A part-synthetic SAE 80W-90 gear oil specifically developed to meet all the gear oil requirements for both manual transmissions and final drives. The unique additive system provides the extreme pressure protection needed in heavy-duty differentials as well as the frictional properties required for smooth shifting synchromesh manual transmissions.

FEATURES & BENEFITS

- High oxidative stability enables better component cleanliness and longer oil life, resulting in extended servicing
- Excellent viscosity/temperature characteristics
- Synthetic base oil provides enhanced lubricant durability
- Excellent shear stability ensures high performance throughout lubricant's life
- Offers rationalisations that reduce workshop stockholding and helps prevent service filling errors
- Reduced gear change baulking at low temperatures
- Excellent differential cleanliness • Reduced wear • Extended drain

FULLY SYNTHETIC OPTION – SAE J 2360 APPROVED

CASTROL SYNTRAX E 80W-140

- Fully synthetic rear axle oil for arduous service in rear axle (differential) and power dividers.
- Recommended for use in Eaton and Meritor rear axles operating where long oil drain periods and extended warranty conditions apply.
- Also recommended for use under severe conditions, particularly in B-double or road train applications.

FEATURES & BENEFITS

- Provides protection at extremes of very low/high operating temperatures
- Improved performance over conventional mineral API GL-5 85W-140 lubricants
- Reduced wear, increased gear component life
- Approved for extended warranty programmes for longer rear axle drive life.
