PACCAR connect

Simplify your business

KENWORTH DAF

PACCAR Connect is an advanced fully integrated digital productivity and telematics platform with the power to simplify, streamline and optimise your transport operations.

True to name, it seamlessly connects your operational staff, your drivers, and your PACCAR Dealer support network in real time, logging and analysing data continually from every Australian-made Kenworth and DAF truck.

Whether you're behind the wheel, behind a desk, or in the workshop, PACCAR Connect equips you and your team with the insights needed to make smarter decisions and work with maximum efficiency.

The total technical expertise of PACCAR will also be your constant companion—every delivery, every day, every kilometre—often providing the help you need before you even know it's needed.

OPTIMISE EVERYTHING

With PACCAR Connect you can quickly analyse the performance of your overall operation, or drill down to specific trucks. Routes across multiple vehicles and days are displayed on a single screen. PACCAR Connect makes it that simple.

MAXIMISE UPTIME

Turn the key and PACCAR Connect goes to work, constantly monitoring your truck's critical systems. If there is a light on the dash, PACCAR Connect will tell you it's on and why. Details of severe faults can be shared immediately with the driver, enabling informed, on the spot decision-making. Minor faults can be clearly identified and incorporated into your scheduled maintenance program. Peace of mind—whatever the situation—that's what you can look forward to with PACCAR Connect.

STREAMLINE COMPLIANCE

Not only does the comprehensive data gathering of PACCAR Connect simplify and expedite the fulfilment of your road transport compliance requirements, it can also provide customer data into your own business systems to help automate internal processes, saving you hours of data administration for your fleet every week.

Through shared APIs it also connects with established and accredited industry leading third party systems such as *Gearbox, Logmaster* and *SafetyCulture*.

PACCAR Connect syncs asset information with *Gearbox's* maintenance and compliance system to enable automated calculation of services due and running costs with consistent and timely meter reading updates.

PACCAR Connect syncs with *Logmaster* to provide an integrated Electronic Work Diary (EWD) for your fleet. With up-to-date asset and odometer readings, it saves time, reduces manual entry and improves reporting accuracy. *Logmaster's* electronic work diary and compliance system is NHVR accredited and compliant for use nationally.

ENHANCE SAFETY

PACCAR Connect allows operators to configure a host of advanced safety and performance measures. Emergency braking and potential rollover events can be set to trigger instant alerts.

PACCAR Connect syncs with *SafetyCulture* enabling users to create real-time reporting, proactive hazard mitigation and a unified view of compliance data that enhances both vehicle and operational safety. *SafetyCulture* enables users to create digital pre-start checklists, pre-fills vehicle information and enables drivers to conduct inspections and escalate issues on the go—ensuring vehicles are safe and in the best condition on the road.

AUTOMATE FUEL TAX CLAIMS

In partnership with KPMG, PACCAR Connect has the ability to offer end-to-end automation of fuel tax credit claims, using telematics data to identify vehicle on and off road usage across the country. Unlike traditional claim methods, this method is assisted by the use of embedded data from PACCAR Connect and advanced data modelling to automate the FTC claim process. Providing a secure and seamless method for customers to claim their full fuel tax credit entitlement. It's a truly valuable feature, available through PACCAR Connect.

KEEP EVERYONE INFORMED

Timely communication is good for business. PACCAR Connect lets you geofence your depot and any destination, so that entry and exit notifications can be generated automatically to better manage your expectations, and those of your customers.

With PACCAR Connect you can set alerts on vehicle parameters and movements—it can even tell you the battery is flat before the driver is awake.

PACCAR Connect can email you an alert keeping everyone informed.

- ✓ **Work smarter not harder with real-time insights**
- ✓ **Get more money back faster, with automated fuel tax claims**
- ✓ **Know the real issues, with instant fault code notifications**
- ✓ **Make better, more informed decisions to increase your uptime**
- ✓ **Streamline the management of your compliance**
- ✓ **Improve your awareness of potential safety issues**
- ✓ **Experience the enhanced support of your PACCAR support network**
- ✓ **Rely on proven technology with PACCAR Connect**

PROVEN TECHNOLOGY

Designed, built and manufactured in Melbourne, PACCAR Connect utilises proven technology. All data is hosted and stored within a secure environment in Australia. An intuitive, easy-to-use web portal and mobile phone app provide access to system settings, functions, live data all within a secure SOC 2 Type 2 AWS-partner approved accredited system.

VIDEO TELEMATICS

PACCAR Connect can be paired with smart connected 1080p DVR cameras to give you instantly retrievable footage for 30 days and automatic trigger recording for events, all visible and retrievable in the PACCAR Connect portal and mobile app.

PUT YOURSELF IN THE KNOW

PACCAR Connect is the ultimate productivity tool. Harnessing the technical expertise of PACCAR, it turns information into insights that streamline and simplify your operations, promoting greater productivity and profitably all year round. The platform's real time diagnostic capabilities also ensure your PACCAR support network is alerted. Faster, better informed roadside support is the result, maximising uptime for your truck.

PACCAR Connect is a proprietary technology, available exclusively for use on Kenworth and DAF trucks. Embedded at the time of manufacture, its protocols and deep integration with major vehicle systems deliver capabilities beyond those of aftermarket solutions.

For more information or to activate PACCAR Connect, speak to your PACCAR Dealer today or **www.paccar.com.au/about-us/technology.**

Access comes standard with most Kenworth and DAF trucks

Your first 12-month subscription to the web portal is accessed free of charge and can be activated in a matter of minutes. PACCAR Connect technology is available on all Kenworth and DAF vehicles from the factory. It can also be retrofitted to earlier models and with a range of accessories through your local dealership. Invest nothing but your time to understand the platform's many significant benefits.
