

 **KENWORTH**

T909

Where tradition meets performance

T909

Whether you're in logging or livestock, navigating the outback or running up and down the interstate highways, the T909 is designed to perform in a range of conditions and applications. Proving itself a versatile and dependable workhorse, the T909 is synonymous with durability and reliability, earning its place as a favourite among operators who value a product that delivers.

Engineered and built in Australia for exceptional performance in configurations ranging from singles, doubles, triples, quads and unique combinations under performance-based standards, the T909 is equipped to handle all manner of tasks with confidence. It's in these heavy-duty applications where the T909 really comes into its own, particularly where fuel capacity and front axle weight are critical considerations.

Power and prestige

To meet the diverse needs of operators and to allow for maximum durability, fuel capacity, and the option of auxiliary frame-mounted equipment, Kenworth offers customisable wheelbases and frame layouts. Available in 6x4 and 8x6 configurations, the T909 features a classic full-length bonnet and drop front frame, designed to accommodate a larger radiator, ensuring superior cooling performance, even in the harshest conditions.

The T909's extended chassis design maximises fuel tank space, meaning you're always ready for the long haul. Complementing the frame layout is a wide range of fuel tank options tailored for various applications. Standard polished aluminium tanks promote weight savings, while painted steel tanks are available for more demanding tasks.

For more than 30 years, the T9 and its predecessors have stood proudly as a demonstration of Kenworth's commitment to delivering reliable, dependable, application-engineered solutions to the heavy-duty market.

Engine and Drivetrain

Incorporating class leading style and performance, you can rely on the T909 to deliver performance without compromise across a diverse range of heavy-duty applications.

Optimised for the Cummins X15 Euro VI engines and available in a range of horsepower and torque ratings up to 625 hp and 2,050 lb-ft of torque, you have flexibility suitable for both manual and automated transmissions for vocational, heavy-haul and line-haul applications. Delivering not just power and driveability, the durability of the X15 is assured using proven hardware while continuous improvements have resulted in reliability that gives you peace of mind on the road.

Power meets precision with the Cummins X15 Euro VI engine in the T909, paired with your choice of an 18-speed manual transmission or the cutting-edge 18-speed Endurant XD Pro automated transmission. The manual Roadranger has continued to set the benchmark for generations and the new Endurant XD Pro offers drivers a new level of comfort and performance.

Advanced engine management technology works in harmony with vehicle sensors to deliver smart, seamless shifting—every time. Whether you're navigating tight spaces or cruising the open highway, the Endurant XD Pro offers a lighter, smoother drive engineered for maximum efficiency. Delivering improved fuel consumption, lower maintenance costs, and a driving experience that sets a new standard for performance and reliability.

With a range of engine, transmission, driveline and suspension options designed specifically for Australian conditions, you have a trusted drivetrain solution that can be tailored to your needs and application.

The best driver experience

The T909 cabin is designed with safety and confidence in mind, featuring a 'Daylight door' design that provides an exceptional field of vision from the driver's seat. The expansive one-piece, or optional two-piece, curved windscreen ensures a commanding view of the road ahead, offering outstanding visibility both in front and behind.

A wrap-around instrument panel facilitates easy access to controls and includes an optional adjustable steering column, complemented by a 'Smart Wheel' with fingertip controls for essential operational functions such as engine brake and cruise control. Conveniently positioned in the centre of the dashboard is an 8-inch audio visual navigation unit with smartphone mirroring, and wireless phone charging.

The overhead console is equipped with two storage compartments and additional blank panels for vehicle information displays and radios.

The cabin also boasts high-quality 'soft plush' upholstery in the classic diamond studded pattern, available in a variety of colours. A selection of premium seats further enhances driver comfort and safety. And with various sleeper options available for rest periods, you can make your T909 your own.

← Safer by design

T909

We know every operator's business is unique. That's why we build trucks tailored to your specific needs, ensuring safety is not just an add-on but an integrated part of the truck.

Safety begins with design and robust construction. Featuring high-strength materials, our trucks are carefully engineered and tested to global safety standards to protect drivers in the instance of a frontal collision, rear cab impact or roll over scenario.

Operational details such as high visibility grab handles, flat floors, enhanced illumination of steps and landing areas are also critical to the driver.

Visibility is also key to safe driving. This is demonstrated not just through our cab designs, mirror selection and positioning, but all Kenworth trucks can be equipped with blind spot monitoring and optional forward, side and rear facing camera systems. Each of these features help drivers identify vehicles in blind spots and provide a comprehensive view around the truck, enhancing manoeuvrability and safety.

Active safety systems are now commonplace in road transport and are the foundation of the road safety of any vehicle.

Our advanced safety systems are meticulously optimised for Australian conditions and the tasks you undertake. Whether you're navigating rugged outback roads or a busy urban street, your Kenworth truck can be equipped with any of the very latest active safety features you require.

These systems are complemented by the latest collision mitigation systems, including features such as lane departure warning, autonomous emergency braking and forward collision warning. Using onboard radar, cameras and sensors, these technologies are designed to maintain safe driving, by either warning the driver, or actively supporting them to avoid a collision.

Our commitment to safety extends to providing ongoing support and training, ensuring drivers are equipped to use these advanced systems effectively. With a holistic approach to safety, we empower operators to maximise the features designed to protect them and others on the road.

When you choose Kenworth, you're selecting a truck not only built for performance but designed with your safety in mind. Our comprehensive suite of safety features reflects our dedication to building trucks optimised for Australian conditions.

Knowledge is power

PACCAR Connect is an advanced fully integrated digital productivity and telematics platform with the power to simplify, streamline and optimise your transport operations.

SIMPLIFY YOUR BUSINESS

Whether you're behind the wheel, behind a desk, or in the workshop, PACCAR Connect will equip you and your team with the insights needed to make smarter decisions and work with maximum efficiency.

OPTIMISE EVERYTHING

With PACCAR Connect you can quickly analyse the performance of your overall operation, or drill down to specific trucks. Routes across multiple vehicles and days are displayed on a single screen. PACCAR Connect makes it that simple.

WORK SMARTER NOT HARDER

Turn the key and PACCAR Connect goes to work, constantly monitoring your truck's critical systems. Onboard fault detection is displayed on the dashboard, enabling informed, on-the-spot decision-making. Peace of mind—whatever the situation—that's what you can expect with PACCAR Connect.

STREAMLINE COMPLIANCE

PACCAR Connect streamlines compliance by syncing critical data. It works with Gearbox to automate service scheduling, parts tracking, training, and work orders—so nothing gets missed. Integration with Logmaster provides an NHVR-accredited Electronic Work Diary (EWD) that's compliant nationwide. Real-time asset and odometer updates save time, reduce manual entry, and improve reporting accuracy.

ENHANCE SAFETY

PACCAR Connect lets operators configure advanced safety and performance features. Triggering instant alerts for emergency braking or rollover events and syncing with to the cloud for real-time reporting, hazard prevention, and integrated compliance. Digital prestart checklists, auto-filled vehicle details, and mobile inspections make it easy for drivers to escalate issues on the go—keeping every vehicle safer and road-ready.

AUTOMATE FUEL TAX CLAIMS

In partnership with KPMG, PACCAR Connect facilitates fuel tax credit claims using real-time data to identify on and off-road activity. Claims are pre-approved by the ATO, so refunds are processed and in your account with a minimum of fuss — a valuable feature accessible to any transport business.

KEEP EVERYONE INFORMED

The best network just got smarter. Your Kenworth dealer now has access to vehicle data, enabling faster, better-informed roadside assistance. Minor issues can be scheduled into regular maintenance—maximising uptime for every truck.

PACCAR Connect is proven proprietary technology, available exclusively for use on Australian made Kenworths. Embedded at the time of manufacture, its unique protocols and deep integration with major vehicle systems deliver capabilities beyond those of aftermarket solutions.

The PACCAR Network

Comprising nearly 100 locations, Kenworth has built an extensive truck dealer network across Australia, New Zealand and Papua New Guinea. The PACCAR network is renowned for its professionalism and excellence in the truck industry, and for the calibre of its comprehensive range of support services.

PACCAR Australia

Australia's best Dealer network, supported by the Cummins branch network, ensures a Kenworth representative is always close at hand to provide expert support. The in-depth knowledge of Kenworth mechanics and the exclusive use of genuine Kenworth and PACCAR parts, maximises uptime for the life of your truck.

PACCAR FINANCIAL

Dedicated solely to the Australian transport industry and with more than 40 years' experience, PACCAR Financial continue to support with innovative loan and lease options.

PacLease helps fleet operators achieve their business goals through short and long-term rental and leasing solutions, including value-added services like telematics, preventive maintenance, and 24/7 Roadside Assistance.

Our dedicated 1800 Roadside Assistance Service covers Australia offering 24/7 support. Simply call 1800 4 PACCAR (1800 472 222) to be connected to your nearest PACCAR Dealer.

In addition to maintaining an extensive inventory of Kenworth parts and accessories, the PACCAR Parts distribution centres provide daily deliveries to every dealership in Australia. Whatever your truck servicing requirements, we can get the parts you need, to where you need them.
