ENVIROSHIELD - **21ST CENTURY TECHNOLOGY PAINT FINISH**

EnviroShield Paint Finish is the 'ultimate' in paintwork protection and preservation. It's designed to repel dirt and grime whilst still allowing the paintwork to breathe.

It's dynamics help keep damaging environmental and organic contaminants from attacking your vehicles paintwork, specifically bird droppings, tree sap, road grease, oil and even acid rain.

- Provides the 'ultimate' in high gloss protective coating
- Outstanding stain resistance against environmental and organic contaminants
- EnviroShield is highly durable, hard, long lasting finish
- Unlike conventional paint sealants and polishes, EnviroShield doesn't form an airtight barrier over the vehicles paintwork, allowing it to breathe
- Contains patented biodegradable components (not soluble in water)

And how to keep that long lasting shine?

To ensure a great looking finish that lasts and lasts, simply wash your vehicle at regular intervals with EnviroShield's Wash Renewer Concentrate, and you'll be assured of keeping that showroom shine!

PROTECTING THE INTERIOR - ADVANCED INVISIBLE PROTECTIVE BARRIER

Interior protection guards against expensive repairs and clean-ups, saving you time and money.

FABRIC AND CARPET PROTECTION

- Provides strong and effective stain resistance
- Seals and strengthens fibres
- Easy care, stains and spills are wiped away
- Helps preserve original appearance
- Helps protect against fade from UV damage

VINYL AND LEATHER PROTECTION

- Penetrates and permanently seals the surface
- Provides UV protection
- Keeps hard vinyl and leather surfaces supple
- Helps protect against scuffing and stains
- Seals the surface area, helping to prevent cracking, fading and discolouration
- Extends the life of vinyl and leather

Eliminate stains.

It's hard to keep liquids, food, dirt and grime out of your car no matter what you do, but you can make certain they don't stain!

RUSTPROOFING - PROTECTION

This unique wax-based rust proofing solution is applied to all the hidden places that rust can sneak into. Providing a protective shield, it seals out rust that forms by the combination of air, water, salt and road grime.

- Penetrates all joints, seams plus tail & headlight mountings
- Under bonnet, doors and sills and boot interior
- Complete underbody protection
- Thixotropic compounds completely seal metal components
- Self healing over minor scratches and scrapes, inhibits its ability to form rust
- Conforms to Australian Standards for anti-corrosion products
- Neutralises any existing rust, preventing its further spread
- Annual inspections on rust treatments are required to maintain the validity of the warranty, some fees apply. Please refer to the warranty conditions

RUSTSTOPPER - ELECTRONIC CORROSION INHIBITOR

Rustopper is the most advanced electronic anti rust treatment in the world, protecting your vehicle in areas other rust proofing can't reach.

- RustStopper is 100% environmentally friendly and chemical free
- The RustStopper module employs state of the art embedded computer controls to generate a high speed pulsed current action to reduce iron loss or corrosion
- Helps prevent scratch and stone chip corrosion from spreading
- Laboratory tests demonstrate a reduction in the corrosion process by as much as 80%, effectively doubling your vehicle's life span against rust and corrosion
- A unique voltage regulator shuts off the unit if the vehicle battery voltage drops below 11.5 volts. The unit draws 11 milliamps (about the same as a digital dashboard clock)
- Complements underbody rust applications by treating 'above the window sills'
- The RustStopper system carries a Lifetime Warranty on new vehicles against corrosion
- Some conditions apply, refer warranty conditions for full details

UNDERBODY - SOUND DEADENER

Help deaden road noise and cut down vibrations. Recommended to be used in conjunction with Rust Proofing to enhance underbody protection.

Sound Deadener coats and insulates your vehicle's underbody surfaces (including weld joints, wheel arches and seams) to help deaden road noise and cut down vibration. A rubber-based product is applied to form a self-healing coating that completely covers all underbody metal surfaces. Thixotropic compounds complete the sound deadening and insulation seal.

- Rubber-based, self-healing compound
- Helps insulate against extreme temperatures
- Keeps you cooler in summer and warmer in winter
- Total all-round chassis protection when combined with Rust Proofing
- Helps to dramatically extend the life of your car
