

PRODUCT SPOTLIGHT

DIESEL PARTICULATE FILTERS

Alliance Truck Parts Diesel Particulate Filters (DPFs)* are engineered and manufactured to OEM specifications. In order to maintain the truck's original fuel economy and regeneration performance, it is important that your DPF meets factory backpressure and NO2 conversion rates. Alliance DPFs do both, ensuring no drop in performance vs. an OE filter.

*Alliance DPFs are currently not available for sale or installation in the state of California.

AIR SPRINGS

A smooth ride can make or break the quality of both driver and payload. Alliance Truck Parts Air Springs are produced with high-quality rubber which allows perfect operation on various road conditions and in a wide temperature range. Air Springs are available for numerous applications, designed to keep truck and trailer smooth and level with the driver safely in control.

THE ALLIANCE ADVANTAGE

Alliance has a wide range of product lines that are available at hundreds of locations across North America, offering availability, reliability and trust.
