# DAILY HI-MATIC: THE NEXT GENERATION GEARBOX

## **INDUSTRY FIRST 8 SPEED AUTOMATIC GEARBOX**

The latest ZF 8-speed automatic gearbox is designed to provide unrivaled performance and comfort. Equipped with an ergonomic, multifunction shift lever that provides both full automatic or sequential shift, the driver has complete control to best suit the road and traffic conditions. With the choice of either sequential or full automatic mode, the HI-MATIC offers complete control to the driver.

## **OUTSTANDING FUEL ECONOMY THANKS TO A CHOICE OF ECO OR POWER MODES**

Whether it be responsive power you require or reduced fuel economy, you can have both with the latest HI-MATIC. With the simple push of the shift lever to ECO or PWR modes, the HI-MATIC transmission delivers what's required. Featuring self-adaptive shift strategy, the HI-MATIC transmission smoothly engages the most appropriate gear in less than 200 milliseconds and with the widest ratio spread, the engine will always be at the optimal speed.

## **10% LOWER MAINTENANCE AND REPAIR COSTS THANKS TO RECORD RELIABILITY AND DURABILITY**

Designed with durability in mind, the New Daily design solutions protect the engine and transmission to ensure less maintenance. The latest version of the HI-MATIC now boasts a revised oil to air cooler and a new two-speed fan for even better performance in Australia's hot conditions. Our engineers have ensured that the legendary durability of the Daily is continued.

## **BEST IN CLASS PERFORMANCE, HIGHEST POWER (205 hp) AND TORQUE (470 Nm)**

With class leading power (205 hp), torque (470 Nm), payload capacity (4500 kg) and the HI-MATIC transmission, the New Daily is the best vehicle in its class.
