

Monitor driver and fleet performance, whenever you want from wherever!
This intelligent and user-friendly platform will enable you to **stay in control of your logistics processes**, and to get the best out of your people and your vehicles.

Driver and fleet information is available via **live tracking on desktop computer or mobile devices** through easy-to-read and fully customisable dashboards and detailed reports that provide convenient and timely insights.

PACCAR Connect can also **share vehicle data with thirdparty fleet management systems**, allowing you the ability to integrate PACCAR vehicles into your business.

Tracking and Routing
